Restriction Requirement

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in response to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-26 and 43, drawn to a drive mechanism.

Group II, claim(s) 27-33, drawn to a method for assembling a gear housing.

Group III, claim(s) 34-42, drawn to a drive mechanism with can be operated in an emergency.

The inventions listed as Groups I, II and III do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: the invention of Group I is directed to a rack and pinion or spindle drive mechanism for driving a window pane of a vehicle door, the invention of Group II is directed to a method of assembling a gear housing wherein the alignment of the housing plates is obtained through the rotation of the gear elements located therein, the invention of Group III is directed to a drive mechanism which can be operated in the event of an emergency. Although the invention of Group I includes a housing, the special technical features of Group I are not related to a housing having housing plates aligned through the rotation of the gears disposed therein, as set forth in Group II. Additionally, the special technical features of Group I are not related to the emergency operation of the drive mechanism as set forth in Group III. Finally, the special technical features of Groups II and III are not related because Group III does not include a housing and the housing of Group II does not relate to the emergency operation of a drive mechanism.

A telephone call was made to Mark Garscia on January 24, 2002 to request an oral election to the above restriction requirement, but did not result in an election being made.

Art Unit: 3634

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Gregory J. Strimbu whose telephone number is 703-305-3979. The examiner can normally be reached on Monday through Friday 8:00 to 4:30.
